

# Wind Image™

For ArcMap

## Seamless Image Integration into ESRI ArcMap Software

### Highlights:

- Supports all coordinate systems currently supported by ArcMap.
- Process GPS track-logs into line or point datasets.
- Create Shp files and ESRI Feature classes
- Supports all ESRI Geo-database types Personal, File, and ArcSde.
- Process photos into hyperlinked and raster embedded datasets.
- Robust set of photo editing tools.
- Photo thumbnail viewer.
- Imprint date time, GPS position, and attributes on photos.
- Native support in both ArcMap and ArcReader for viewing raster embedded datasets.
- Single license can be installed on two computers as long as they are only used by one user. Such as a laptop and desktop PC.
- One year of updates included.
- Automatic rotation of symbology based on compass direction.
- Add processed images to map display for easy printing.
